

Let's break the rules

No commission paid by the restaurant
Crypto earned by the client

[Read the whitepaper](#)

We believe in the power of the community,

the UPXP project finds its strength and meaning through these believes.

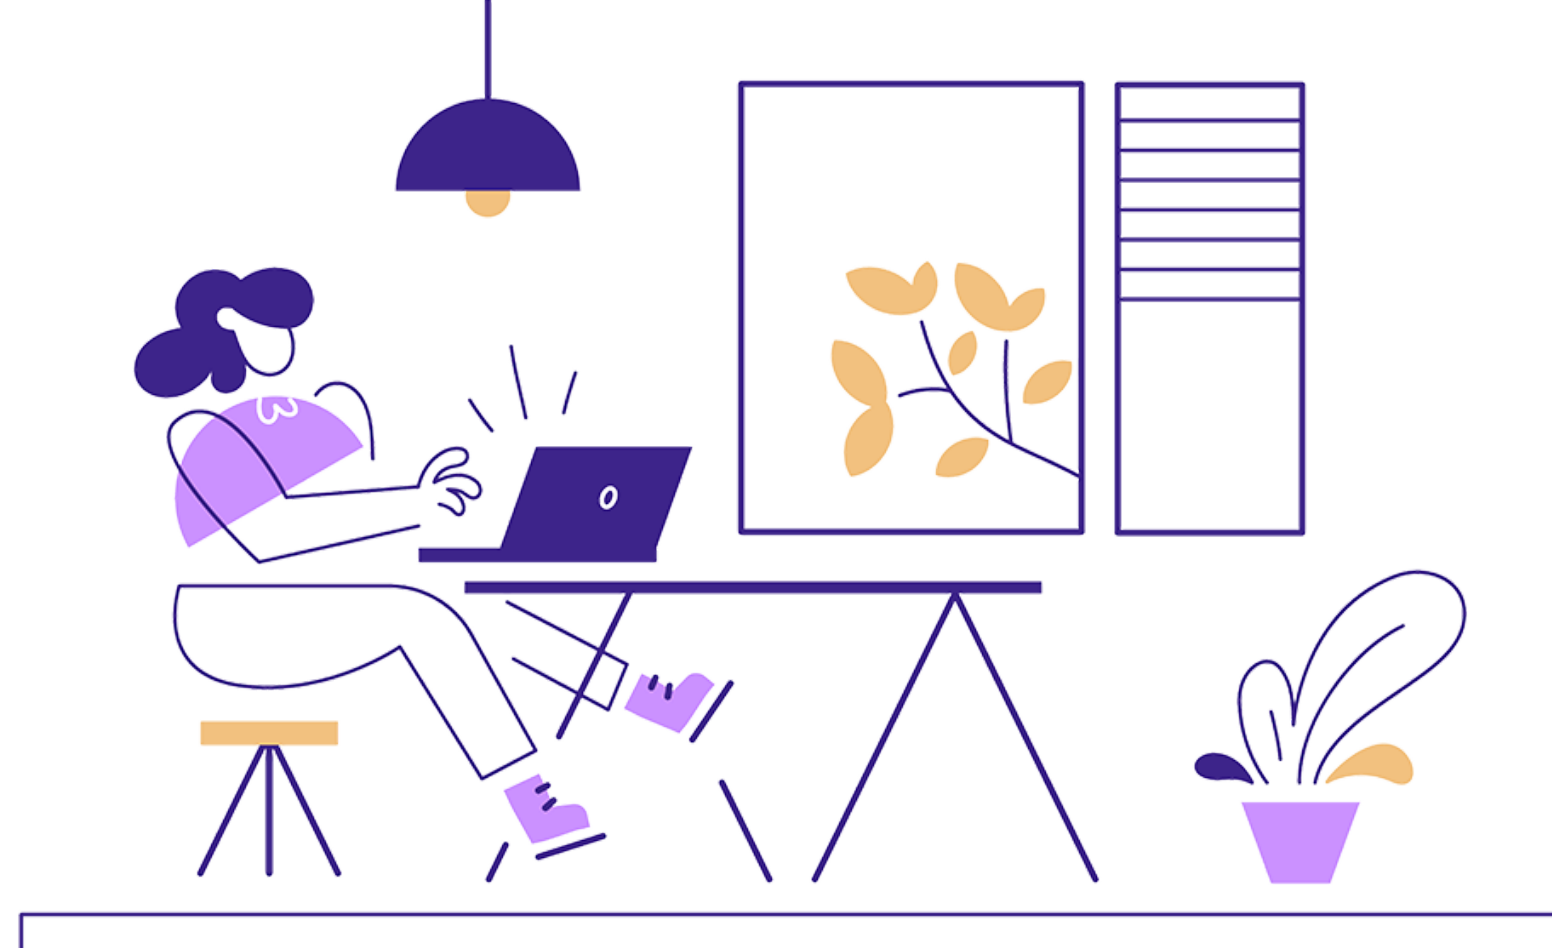

What's UPXP ?

Se présente comme une rupture du modèle économique des commissions sur chiffre d'affaires.

UPXP va supprimer la charge financière que représentent les abonnements et commissions versés par les points de vente aux intermédiaires qui leur apportent des clients.

En échange, les points de vente reverseront un tiers de l'argent économisé à leurs clients en crypto-monnaie UPXP et conserveront les deux tiers pour augmenter leurs profits.

UPXP va donner plus d'autonomie et d'indépendance aux points de vente dépendant de tiers qui profitent de leur position dominante.

Restaurants pays these commissions to the third parties

 30% Commission each time you order food via an app	 \$2 Per person each time you use an app to book a table	 4% Credit card commission each time you pay your food
---	--	--

FREE

Let's provide all these services to the restaurant for free

Give a part of the profits to the customers as Crypto rewards

What's the advantage of UPXP ?

For the restaurant owners

A free professional suite of applications for the restaurants to manage their activity. All the tools a restaurant needs are provided by UPXP Pro.

For the consumers

A crypto rewards program. Each time you order food or book a table via the UPXP application you earn crypto.

Why we don't do an ICO

When you invest in an ICO that lasts several weeks, the demand for this token has been fulfilled already during the ICO.

It is always tempting for projects to raise the maximum amount of money, on the other hand when the token is listed, most values drop as soon as they are introduced because 'there is no more demand'.

UPXP is a utility token, the value will increase in proportion to the number of users who will use the UPXP reservation and ordering application.

Restaurants will need to purchase UPXP tokens to be visible on the UPXP app and reward their customers.

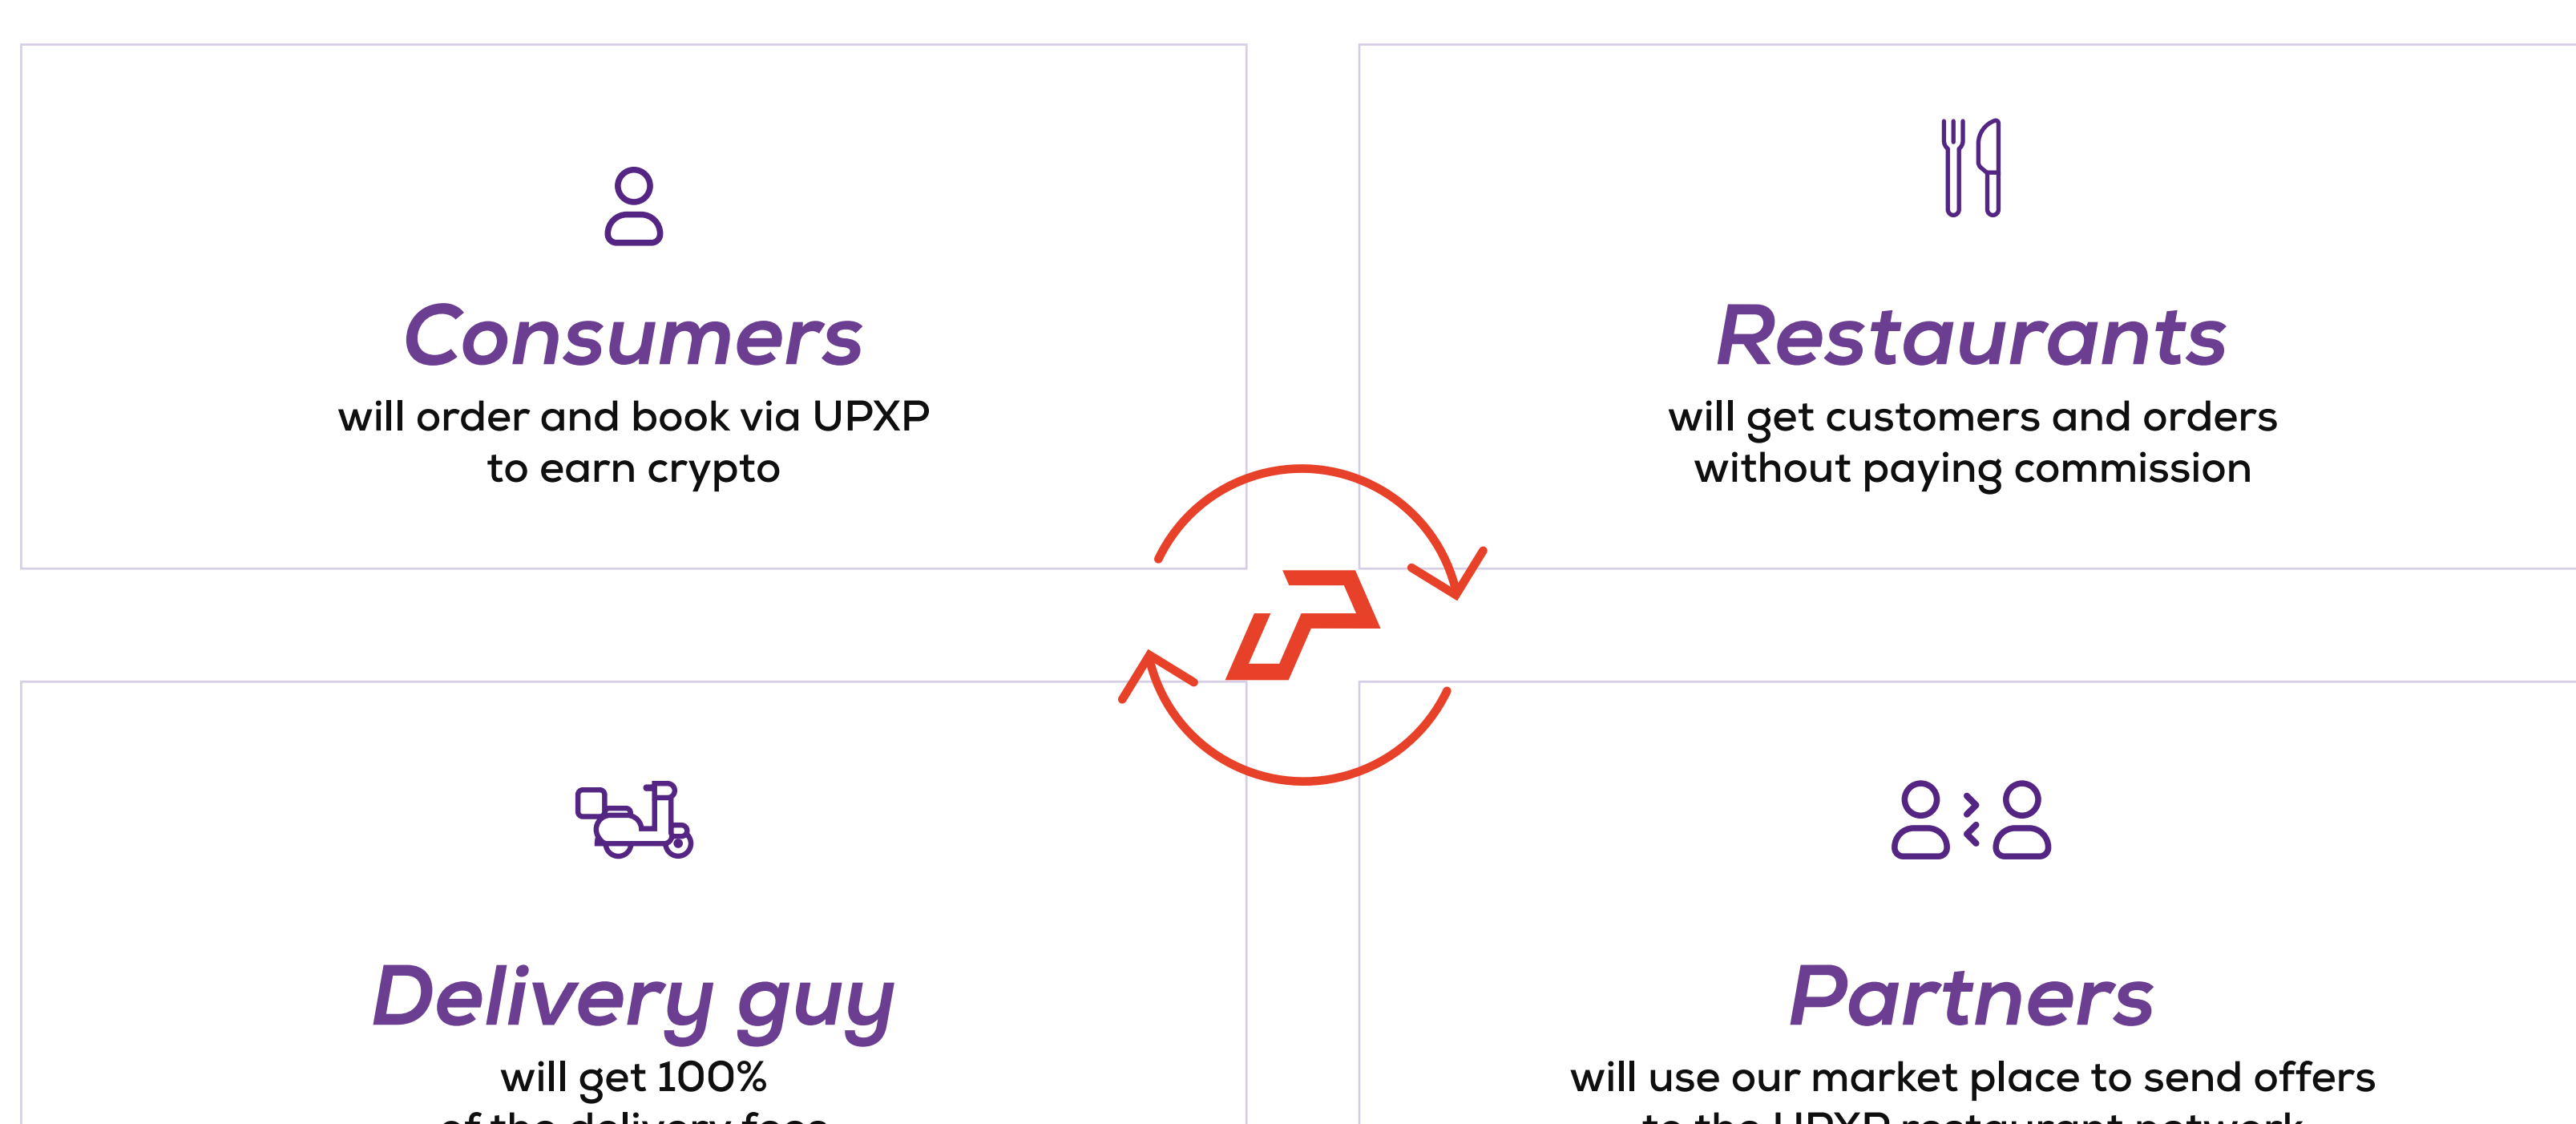

The community acts to increase the UPXP value

UPXP users will engage their friends to use UPXP to book a table or order food in the restaurants, more users means more demande of UPXP token.

Because the restaurants dont pay any commission to us, they will do the promotion of the UPXP App to their customers and engage them to book and order through UPXP App.

Virtuous ecosystem

The UPXP Token

UPXP is developed on the Stellar blockchain, which guarantees a fixed transaction fee of 0.0001 XLM, no matter how much you buy, sell or transfer your UPXP token, you will not be charged with high transaction fees.

Paying for your meals with your UPXP token will take less than 4 seconds and no fees will be charged.

Receiving UPXP token as a payment means that a restaurant pays 0.0001 XLM or \$ 0.00003 transaction fee at the current rate.

A very significant saving for the restaurateur who currently pays between 3% and 7% of his turnover in bank charges.

Decentralized Data

The creation of a decentralized cloud consists of the devices used by the restaurant to manage their business.

Tablet, PC, smartphone ... UPXP Pro applications will be installed on these devices.

This cloud will run on the technology used by P2P platforms.

Big players like Thefork, Opentable, Deliveroo or UberEats charge tens of thousands of dollars per restaurant a year, when they use their applications.

UPXP's goal is not to imprison restaurateurs with monthly subscriptions and high commissions on the turnover, but to make them independent and free.

Roadmap

Tokenomics

Air drop 20%	Team 10%	Private sale 1 10%	Private sale 10%	Partners 10%	Liquidity pool 10%	Restaurant 30%
